

Remote temp control. Effective operations.

Byggnads AB Bröderna Persson is a family-owned property company in the third generation. The company's property portfolio consists of residential, retail and office premises in Skåne and Blekinge, where good and long-term relationships with tenants permeate the business.

CUSTOMER

Byggnads AB Bröderna Persson

TYPE

Private Property Owner

AREA

16 451 m²

CITY

Kristianstad, Sweden

SERVICE

Egain Edge

Byggnads AB Brothers Persson has long been members of the Sweden Green Building Council and is actively working to ensure that their properties are as energy efficient as possible, including all consumed energy from renewable sources. As members of Real Estate Owners South, in 2011, Egain received a favorable proposal to test Egain Edge on a property where 10-12% energy savings were promised by simple means.

RESULT

Decreased heating costs:	EUR 36 829 (1 year)
Reduced CO₂ emissions:	22 443 kg (1 year)
Reduction of kWh / m² / year:	35
Energy savings / year:	23%

“Already in the first year we made 15% savings on the property in which we tested the service. After this we have connected the remaining suitable properties and today make a total of 23% savings on an annual basis so Egain Edge has really exceeded our expectations.

Egain's technology is easy to understand, and the Edge analysis platform accurately packs measurement values from our properties and enables us to control and monitor our properties remotely, both in computer and mobile phones. This also means that we get total control over the properties, even if we do not have to get out to the property to check the temperature for any deviations, saving you countless hours for our personell”
